Professional Summary

Full Stack Developer and Technical Lead with 2+ years of experience delivering production-grade web applications across 4 client projects. Proficient in TypeScript, React.js, Next.js, Node.js, and cloud platforms including AWS and Microsoft Azure. Hands-on experience designing REST APIs, building serverless architectures with Azure Functions, and modeling NoSQL databases with Cosmos DB and Prisma ORM. Comfortable owning the entire development life cycle - from architecture decisions and team leadership to deployment and client delivery.

Technical Skills

Languages	TypeScript, JavaScript, Java
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend & APIs	Node.js, Express.js, REST APIs, Azure Functions (Serverless)
Databases	MongoDB, Azure Cosmos DB, PostgreSQL, Prisma ORM
Cloud & DevOps	AWS Amplify, Microsoft Azure, CI/CD Pipelines
Tools	Git, GitHub, VS Code

Experience

Yectra Technologies <i>Full Stack Developer & Technical Lead</i>	Apr 2024 – Present <i>Coimbatore, Tamil Nadu (On-site)</i>
- Architected and delivered 4 full stack web applications end-to-end using Next.js, Node.js, and MongoDB — owning system design, API development, and cloud deployment across all projects. - Designed and built serverless REST APIs using Node.js and Azure Functions, implementing modular, maintainable business logic that reduced backend complexity and enabled independent service deployment. - Modeled and optimized NoSQL databases in Azure Cosmos DB and MongoDB to support high-performance, schema-flexible data operations across multiple production environments. - Mentored 3–5 developers through code reviews and pull request feedback, raising code quality standards and reducing review turnaround time across all projects. - Led sprint planning and task estimation — breaking down client requirements into well-scoped tickets and keeping all 4 projects on schedule with zero scope overruns. - Served as the primary technical contact for client discussions — translating business requirements into technical specs and resolving issues before they escalated.	

Projects

Software Marketplace	<i>Node.js · Azure Functions · Cosmos DB · REST APIs</i>
- Built a backend-driven platform enabling users to create, manage, and publish applications with version control — deployed on Azure serverless infrastructure for cost-efficient, on-demand scaling. - Modeled flexible NoSQL schema in Azure Cosmos DB to handle dynamic app metadata and concurrent user interactions across the platform.	
Truck Fleet Management System	<i>Next.js · Node.js · AWS Amplify · AWS Cognito</i>
- Built a full-stack fleet management platform with separate Admin and Driver portals — enabling real-time task assignment, execution tracking, and fleet visibility. - Implemented role-based access control (RBAC) using AWS Cognito for secure authentication and deployed on AWS Amplify with CI/CD pipelines for cloud-native reliability.	
Doctor Vanilla — E-commerce Storefront	<i>Shopify · Liquid · JavaScript · CSS</i>
- Delivered end-to-end Shopify development for an organic vanilla extract brand — from requirement analysis and theme customization to production launch. - Integrated payment gateways and third-party services for seamless order processing and fulfillment, optimized for mobile responsiveness across all devices.	

Education

Kongu Engineering College, Erode <i>Bachelor of Engineering — Electronics & Communication Engineering</i>	2020 – 2024 <i>CGPA: 7.8 / 10 (78%)</i>
